

Affirmative A2: Wind is not Ocean

1. We meet: Our Offshore Windfarms are clearly **Offshore** – they are not located on land.
2. We meet: Ocean currents and the water cycle is an essential part of the development – wind over the ocean is significantly stronger
3. We meet: The phrase “US Territorial waters” in our plan text makes our case topical since these waters are legally part of the ocean
4. We offer the best limits for debate – Offshore in US Territorial Waters are clearly “OCEAN” but land would not be topical. This is the best brightline.
5. No specific abuse in this round – they had plenty of arguments to run against us and our case is clearly in the mainstream of literature on this topic. Don’t vote on hypothetical abuse in an imaginary debate round – this round has no abuse, so we are topical.
6. T is not a voter for Reasonability – if you believe that our case is reasonably topical, then you vote aff.
